SUMMARY

Vocational high school student with skills in web development and IoT, experienced in visual design and website-based application development. Passionate about growing and gaining experience through digital internship programs.

EDUCATION

SMK TI BAZMA ISLAMIC BOARDING SCHOOL

SMK TI BAZMA is a boarding school with a 4-year learning program. During my studies, I learned web development, graphic design, Internet of Things, computer systems, creative business development, religious studies, and other general subjects while developing discipline and teamwork in a boarding school environment

PROFESSIONAL EXPERIENCE

Social Media Branding , MENTION (Media Design and Information)

2025 - Now

Mention (Media Design and Information) is the backbone of SMK TI BAZMA's media design and information management. We produce various visual content, including graphic design, videos, and promotional materials, to support all school activities

MENTION'S Key Collaborations :

- **BAZMA PERTAMINA (Socmed, Content Creator):** Production Execution Receive and execute monthly content lists into ready-to-use visual assets, including graphic design, photography, and video editing for daily Instagram.
- **Himpana :** Contributed to the creation of visual designs for national events, responsible for designing X-banners, banners, and other printed materials for event publication needs.
- **SPMB SMK TI BAZMA 2025 (Student Admission Program):** Contributed to the multimedia team by designing promotional materials, documenting activities through photo and video, and producing visual content to support the admission campaign and school branding.

EXPERIENCE

Vice Chairman - SMK TI Bazma robotics organization (MCROBO)

2025

Served as Vice Chairman of the SMK TI Bazma Robotics Organization (MCROBO), contributing to team coordination, project management, and the development of robotics and technology activities within the organization.

Student Council Member in the Academic Achievement & Arts and Sports Division

2024 - 2025

Contributed to organizing academic, arts, and sports activities within the student council, including supporting school events, competitions, and student development programs

Member of the West Java Vocational High School Student Council Forum

2024

Participated in the West Java Vocational High School Student Council Forum, collaborating with students from various schools in leadership, organizational, and educational activities.

PROJECTS

Attendance via RFID Card	2025
Attendance system using RFID cards and Arduino. This project was developed to automatically detect student attendance and store attendance data into the system. Tech : C++	
JWS Digital Clock (Prayer Time Clock)	2025
Developed a JWS Digital Clock (Prayer Time Clock) to display real-time prayer schedules automatically. The system was designed using microcontroller technology and LED display integration to provide accurate prayer time information for mosques and prayer rooms	
RC Car with ESP32	2025
Built an RC Car using ESP32 with wireless control capabilities. The project was developed to enable real-time movement control through a mobile device while implementing IoT-based communication and motor control systems	
SPMB - Student Admission System	2025
Built and designed the front-end interface for a registration platform used by 1,000+ users, streamlining the registration flow with automation and WhatsApp integration. Tech: Next.js	

TECHNICAL SKILLS

Engineering : IoT Development, Arduino & ESP32	Development : HTML, CSS, JavaScript, Laravel, React.js, NEXT.JS, C++	Design : Graphic Illustration, UI/UX Design, Adobe Illustrator, Figma, Canva
---	---	---

ACHIEVEMENT & CERTIFICATION

Samsung Innovation Campus Batch 6 & Batch 7	2024
Participated in the West Java Vocational High School Student Council Forum, collaborating with students from various schools in leadership, organizational, and educational activities.	
Data Science	2024
ASEAN Data Science
